PROFILE

Ten years building payment systems where errors cost money: orchestration, smart routing, SWIFT and FIX integrations.

Now I also design how engineering teams ship with AI agents: governed workflows, versioned playbooks and human gates where being wrong is expensive.

EXPERIENCE

ALTEN · Getnet Platforms (PaymentsHub)

2026 – present

Senior Software Engineer

- Backend microservices for payment orchestration and smart routing.
- Lead AI enablement: standardised, governed workflows with Devin and Windsurf, with retrieval-augmented context.

ALTEN · PagoNxt (EMI)

2022 – 2025

Senior Software Engineer

- Payment infrastructure and smart-routing microservices; SWIFT and FIX integrations.

ALTEN · PagoFX

2020 – 2022

Software Engineer

- Backend services for cross-border payments inside the Santander ecosystem.

ALTEN · Holcim

2018 – 2020

Software Engineer

- Enterprise applications and hybrid mobile solutions (Angular, Ionic, Java).

SELECTED PROJECTS

- **Kizuna** — Governed AI engineering: playbooks, one port for eight agent runtimes, human gates and a full audit trail.
- **Plutus** — Six exchanges and seventeen blockchains reconciled into a correct FIFO report for Spanish tax.
- **Txango** — Offline Android hiking app: vector maps, 2,034 routes and no Google services.
- **Engineering Platform** — Twenty repositories under one validated contract: shared context, gateway, gate and UI engine.
